

A B S T R A C T
TOPSHEET OF BODY FLUID ABSORPTIVE ARTICLES
AND METHOD FOR MAKING SAME

A topsheet 2 of body fluid absorptive articles comprises a first sheet 5 made of thermoplastic synthetic resin sheet and having liquid passages 10 each downwardly extending therethrough and a second sheet 6 containing 70 to 100% by weight of cellulose fibres bonded to said first sheet 5 around lower openings 12 of the respective liquid passages 10 and comprises mechanically intertwined fibres only. The second sheet 6 has a density higher than a density of fibres contained in the liquid-absorbent core 4.
