ABSTRACT

The present invention relates to the use of biguanide derivatives of general formula I below:

(I)

in which:

the groups R1 and R2 represent, independently of each other, a hydrogen atom, a C_1-C_7 alkyl group, a cycloalkyl group, a heterocycle, a C_2-C_7 alkenyl group, an aryl group, an aralkyl group, an aryloxyalkyl group or a heteroaryl group,

or R1 and R2, taken together, represent a C_2-C_7 alkylene which may contain one or more hetero atoms,

and the group R3 represents a primary, secondary or tertiary amine,

or pharmaceutically acceptable salts thereof, to manufacture a medicinal product with cicatrizing action, the said medicinal product being in a pharmaceutical form for topical use.
