A METHOD FOR INDICATING THE LOCATION OF VIDEO HOT LINKS

ABSTRACT

A method for indicating the location of time dependent video hot links to a user, comprising the steps of: displaying a motion video presentation on a first portion (1010) of a display device (1000), the video presentation including a hot link region (1080) which can be selected by a user to link to different content; displaying an indication of the presence of the hot link region in the video presentation. The method may comprise the further step of altering a visual attribute of at least a portion of the hot link region when a user manipulable cursor is within the first portion. The method may comprise the further step of displaying an indication of the presence of the hot link region in the video presentation on a second portion(1060) of the display screen.
