Fig. 1

(57) **Abstract:** A food receptacle having a tray with a base, a perimeter wall extending therefrom, and a tongue extending from the perimeter wall along a longitudinal axis and a cover adapted to cover the tray. Cover has an opening adapted to receive the tongue therethrough, such that the tongue is inserted through the opening when the tray is covered by the cover. Tongue may include a protrudable portion adapted to protrude away from the longitudinal axis. When protruded, the protrudable portion is adapted to abut the cover. When the tray is covered by the cover, the protrudable portion may be protruded over the top panel to prevent the tongue from being withdrawn from the opening.
