STROLLER

ABSTRACT

A stroller comprises a handle (15) having a shape resembling the inverted letter U, a pair of armrests (16) pivotally joined to the handle (15), a pair of front legs (12) pivotally joined to the armrests (16), respectively, a pair of rear legs (14) pivotally joined to the armrests (16), respectively, front wheels (11) held on lower end parts of the front legs (12), respectively, and rear wheels (13) held on lower end parts of the rear legs (14), respectively.

10 The pair of front legs (12) are set so as to extend obliquely away from each other toward the front wheels (11). The pair of rear legs (14) are set so as to extend obliquely away from each other toward the rear wheels (13).
