

ABSTRACT OF THE DISCLOSURE

Title of the Invention: ABSORBENT ARTICLE

Disclosed is an absorbent article including a main body having: a liquid-permeable surface sheet; a back sheet; and an absorbent core sandwiched therebetween, and two leakage preventing walls provided on two sides of the main body. The overlap of the absorbent core and the surface sheet includes: a main absorbent portion located between the two leakage preventing walls and at the center of the overlap in the widthwise direction; and two grooved portions formed by depressing the overlap and each located between the main absorbent portion and corresponding one of the two leakage preventing walls. The fiber densities of the portion of the surface sheet forming the main absorbent portion, the portion of the surface sheet forming the grooved portion and the leakage preventing wall are related in the order of the grooved portion > the leakage preventing wall > the main absorbent portion.
