

ABSTRACT OF THE DISCLOSURE

COLLECTING AND PACKAGING DEVICE, AND DESKTOP-ORIENTED COLLECTION APPARATUS WITH THE COLLECTING AND PACKAGING DEVICE

A collecting and packaging device and a desktop-oriented collection apparatus based on the collecting and packaging device are provided. The collecting and packaging device has a conveying portion, a supplying portion and an extrusion means. A first packaging unit held in the conveying portion and a second packaging unit held in the supplying portion only come into contact with each other because of operation of the extrusion means. Therefore, a target object on the carrying surface of the second packaging unit can be easily, collectively packaged and turned into one collecting and package plate, thereby rendering simple and convenient a collecting and packaging process for use in daily life, medical services, home care and pet keeping.
