

FISHING APPARATUS

ABSTRACT

[0037] A fishing apparatus is shown generally as 1 in FIG. 1. The fishing apparatus includes a body 20 and at either end of the body there is a first length 21a and a second length 21b of a line with hooks 23a, 23b on respective ends. If a fish bites one of the hooks then the other hook is pulled into a receiving member 30a, 30b so that the hook that has not been bitten is covered so the fish that is hooked will not be damaged.
