(54) Title: FLAME RETARDANT RESIN COMPOSITIONS CONTAINING PHOSPHORAMIDES, AND METHOD FOR MAKING		
(57) Abstract The present invention provides resin compositions comprising a thermoplastic resin, at least one phosphoramidate having a glass transition point of at least about 0 °C, preferably of at least about 10 °C, and most preferably of at least about 20 °C; and at least one adjunct flame retardant. The present invention also relates to articles made from the resin compositions. The present invention also provides methods to make the resin compositions having improved heat properties over compositions known in the art.
