(54) Title: DATA PROCESSING METHOD AND APPARATUS, ELECTRONIC DEVICE, COMPUTER STORAGE MEDIUM AND COMPUTER PROGRAM PRODUCT

(54) 发明名称: 一种数据处理方法、装置、电子设备、计算机存储介质及计算机程序产品

图 3A

- 301 A node device receives a data processing request sent by an object device, and obtains contract identification information, description information of data to be processed, operation type information for said data, and object identification information of the object device that are carried in the data processing request
- 302 The node device searches, for a corresponding target smart contract according to the contract identification information, a blockchain where the target smart contract is stored, and processes said data according to a processing mode constrained in the target smart contract, to obtain a data processing result
- 303 The node device feeds the data processing result back to the object device

(57) Abstract: The present application relates to the technical field of blockchains, and in particular, to a data processing method and apparatus, an electronic device, a computer storage medium, and a computer program product. The method comprises: receiving a data processing request sent by an object device, and obtaining contract identification information, description information of data to be processed, operation type information for said data, and object identification information of the object device that are carried in the data processing request; searching, for a corresponding target smart contract according to the contract identification information,

a blockchain where the target smart contract is stored, and processing said data according to a processing mode in the target smart contract corresponding to the operation type information; and feeding back the data processing result to the object device.

(57) 摘要: 本申请涉及区块链技术领域, 尤其涉及一种数据处理方法、装置、电子设备、计算机存储介质及计算机程序产品, 该方法为: 接收对象设备发送的数据处理请求, 获得所述数据处理请求中携带的合约标识信息、待处理数据的描述信息、针对所述待处理数据的操作类型信息, 以及所述对象设备的对象标识信息, 再根据所述合约标识信息在存储的区块链中查找对应的目标智能合约, 并将按照所述目标智能合约中与所述操作类型信息对应的处理方式, 处理待处理数据得到的数据处理结果反馈给所述对象设备。
