

ABSTRACT
RESOURCE SCHEDULING METHODS, DEVICE AND SYSTEM, AND
CENTRAL SERVER

Embodiments of the present disclosure disclose a resource control method, device and system, and a central server. The method includes: receiving a first Input/Output (I/O) request sent by a client device; assigning a request number to the first I/O request based on a first number interval obtained from a central server; determining a tag of the first I/O request based on the request number of the first I/O request; and scheduling the first I/O request based on the tag of the first I/O request.
