

## **TERMINAL INFORMATION TRANSFER METHOD AND RELEVANT PRODUCTS**

### **ABSTRACT**

Embodiments of the present disclosure disclose a method for transmitting terminal information and a related product. The method includes: receiving, by a first network element, first information from a terminal; and inquiring, by the first network element, a terminal policy based on the first information, the first information being used to indicate the terminal policy stored in the terminal and being content in the form of non-plaintext. The embodiments of the present disclosure can improve the safety of the interaction of information between a network side and terminal in the inquiring of the terminal policy.
