ABSTRACT

MODULAR WASTE GAS REDUCTION DEVICE WITH MULTIPLE REACTION CHAMBERS

A waste gas reduction device with multiple reaction chambers includes a reaction module 100 including a reaction chamber 120 therein and excluding a water treatment exhaust pipe, a water treatment module 200 including a water treatment exhaust pipe 220 therein, and a connection pipe 140 connecting the reaction chamber in the reaction module to the water treatment exhaust pipe of the water treatment module, in which there are a plurality of reaction modules arranged, and the reaction chamber of each reaction module is connected to the water treatment exhaust pipe through the connection pipe.
