

ABSTRACT

Disclosed in the embodiments of the present disclosure are an information interaction method and apparatus, and an electronic device. A particular embodiment of the method comprises: a first service interface receiving index information, wherein the index information
5 indicates part of the information content of a service information body that is presented in a second service interface, the service information body being an information unit for organizing service information; and according to the part of the information content acquired on the basis of the index information, displaying, in the first service interface, the part of the information content and/or related information of the part of the information content.
10 Therefore, a new information interaction mode is provided.
