CLAIMS

1. A cellulose composition comprising cellulose, glucose and sorbitol,

wherein a total content of glucose and sorbitol is 0.7 mg or more and 4.0 mg or less per 5 g of said cellulose composition,

the cellulose composition is a powder, and the powder consists of particles containing cellulose, glucose and sorbitol.

2. The cellulose composition according to Claim 1, wherein a content of a water-soluble substance is 2.5 mg or more and 12.5 mg or less per 5 g of said cellulose composition.

3. The cellulose composition according to Claim 1 or 2, wherein a content of glucose is 0.3 mg or more and 4.0 mg or less per 5 g of said cellulose composition.

4. The cellulose composition according to any one of Claims 1 to 3, wherein a content of sorbitol is 0.2 mg or more and 4.0 mg or less per 5 g of said cellulose composition.

5. The cellulose composition according to any one of Claims 1 to 4, wherein said cellulose composition is a powder, and an average particle size of the powder is 10 μm or more and 200 μm or less.

6. The cellulose composition according to any one of Claims 1 to 5, wherein a water absorption rate is 2.0 g^2/s or more and 9.0 g^2/s or less.

7. A tablet comprising the cellulose composition of any one of Claims 1 to 6.

8. An orally disintegrating tablet comprising the cellulose composition of any one of Claims 1 to 6.
