

ABSTRACTUltrasonic Testing Apparatus

- 5 The invention relates to apparatus for use in Ultrasonic testing, and to a method of inspection or testing using such a tool. The ultrasonic testing tool of the invention comprises an elongate connector (88) arranged between a transducer (90) and a tip or contact head for contact with the component (64) to be tested. The elongate connector (88) carries soundwaves produced by the transducer (90) between the
- 10 transducer (90) and the contact head.
