

BASE MATERIAL FOR COAGULATED EGG-LIKE GELATINIZED PRODUCT,
METHOD FOR PRODUCING COAGULATED EGG-LIKE GELATINIZED PRODUCT,
COAGULATED EGG-LIKE GELATINIZED PRODUCT, AND FOOD PRODUCT

[ABSTRACT]

Provided are a base material for a coagulated egg-like gelatinized product capable of easily reproducing a texture and flavor of coagulated egg, a coagulated egg-like gelatinized product using the base material, and a method for producing the coagulated egg-like gelatinized product and a food product containing the coagulated egg-like gelatinized product. The base material for the coagulated egg-like gelatinized product of the present invention contains an alginate, an edible fat or oil, and a glucide, and is in a liquid state. In the base material for the coagulated egg-like gelatinized product of the present invention, a content of the edible fat or oil is 10 mass% or more and 23 mass% or less, and a content of the glucide is 3 mass% or more and 13 mass% or less.
