(54) **Title**: METHOD AND SYSTEM FOR ROAMING OF A MOBILE COMMUNICATIONS UNIT

Fig. 1

(57) **Abstract**: Method for use when a mobile communication device (40) roams between a mobile communication home network (10) and one or several mobile communication networks (20,26,30,36), which device comprises a SIM card (41). The invention is characterized in that the method comprises the steps of a) the device roaming in a first collaborating network (20); b) the home network allowing the device Internet access to a predetermined Internet address but not general Internet access; c) the device contacting the predetermined Internet address and the user providing login credentials; d) associating an IMSI and/or an MSISDN of the SIM card with a user account identified by the login credentials; e) allowing Internet access to the device in accordance with an agreement tied to the user account. The invention also relates to a system (50).
