(54) Title: CARRYING DEVICE AND A RECEIVING DEVICE

Fig.1

(57) Abstract: The invention relates to a carrying device and a receiving device, in particular a carrying device (1) of a receiving device (2) of a system for inductive power transfer to a vehicle, comprising: - a carrying plate (3), - a first edge element (13) arranged at a first lateral edge (6) of the carrying plate (3), - at least another edge element (14) arranged at a second lateral edge (7) of the carrying plate (3), wherein the edge elements (13, 14) are slanted with respect to the carrying plate (3). Further, the invention relates to a method of manufacturing a carrying device (1) and a receiving device (2).
