(54) Title: SUBSTITUTED QUINOLONE CARBOXYLIC ACIDS, THEIR DERIVATIVES, SITE OF ACTION, AND USES THEREOF

(57) Abstract: Substituted quinolone carboxylic acids and their derivatives are described. These compounds modulate the effect of γ -aminobutyric acid (GABA) via a novel site on the GABA_A receptor complex in a therapeutically relevant fashion and may be used to ameliorate CNS disorders amenable to modulation of the GABA_A receptor complex.
