

IMMUNOGENIC COMPOSITIONS COMPRISING LAWSONIA INTRACELLULARIS

ABSTRACT

- 5 The present invention provides combination vaccines that comprise an immunological agent effective for reducing the incidence of or lessening the severity of PPE caused by *L. intracellularis*, and one or more immunological active components effective in treatment and/or prophylaxis of at least one further disease-causing organism for swine. Moreover, the present invention also relates to a kit that comprises an immunological agent effective for reducing the
- 10 incidence of or lessening the severity of PPE caused by *L. intracellularis*, and one or more immunological active components effective in treatment and/or prophylaxis of at least one further disease-causing organism for swine.
