

Abstract

INSECT TRAP AND AIR TREATMENT DEVICE

5 A user is prevented from experiencing an
uncomfortable feeling in a case where an insect catching part
is to be replaced. A protruding part (202) is provided on a
rear surface (31R) of an insect catching sheet (31) so that the
protruding part (202) can be grabbed, at an opening (201),
10 from an outside of a covering member (3) while the rear
surface (31R) is covering the opening (201).
