

MAINTENANCE MANAGEMENT SYSTEM, MAINTENANCE MANAGEMENT
METHOD, AND MAINTENANCE MANAGEMENT PROGRAM

ABSTRACT

5

A maintenance assist apparatus (300) includes a timing determination unit to determine whether or not it is a timing to acquire a filter image obtained by photographing a filter of an air conditioning machine (100), and transmit to control equipment (190), an image acquisition request (81), when it is determined that it is the
10 timing to acquire the filter image. The control equipment (190) includes a photographing assist unit to display the image acquisition request (81) on display equipment and assist a user (31) in photographing the filter, when the image acquisition request (81) is received. The maintenance assist apparatus (300) includes an image registration unit to acquire the filter image (82) photographed by the user (31) and
15 accumulate the filter image (82) in a storage unit.
