(54) Title: RETRACTABLE SLIDING CHUTE AND TRANSPORT SYSTEM

FIG. 1

(57) Abstract: Technical Problem To easily make a space in a place in which a chute is disposed. Solution to Problem A retractable sliding chute includes (1): a plurality of chutes (2,3) which have respective inclined surfaces (21a,31a) that cause an article received from above to slide down; and a moving part (34) which causes at least one of the plurality of chutes (2,3) to be moved so that the retractable sliding chute (1) is brought into a retraction state from a use state, the retraction state being a state in which at least a portion of at least one of the inclined surfaces (21a,31a) overlaps another of the inclined surfaces in a vertical direction, the use state being a state in which the inclined surfaces (21a,31a) are continuously arranged so that the article slides down on all of the inclined surfaces (21a,31a).
