(54) **Title:** METHOD AND APPARATUS FOR PROCESSING VIRTUAL IMAGE USAGE DATA, AND DEVICE AND STORAGE MEDIUM

(54) **发明名称**: 虚拟形象使用数据的处理方法、装置、设备及存储介质

201 A terminal queries acquired virtual image usage data in response to the start of a target round, wherein the virtual image usage data is used for providing permission to use at least two virtual images

202 The terminal determines, from a plurality of virtual images, at least two first virtual images associated with the virtual image usage data and permission data of the first virtual images

203 The terminal displays, on a virtual image selection interface, image selection controls of the at least two first virtual images in a selectable state, wherein permission data corresponding to the first virtual image is displayed on one image selection control

204 The terminal loads a target virtual image in the target round in response to a selection operation on a target image selection control in the virtual image selection interface, wherein the target virtual image is the first virtual image corresponding to the target image selection control

205 The terminal updates, in response to the end of the target round, permission data of the target virtual image associated with the virtual image usage data

图 2

(57) **Abstract:** Provided are a method and apparatus for processing virtual image usage data, and a device and a storage medium, which belong to the technical field of computers. According to the method for processing virtual image usage data, by means of querying acquired virtual image usage data, at least two first virtual images associated with the virtual image usage data and permission data of the first virtual images are determined, that is, after acquiring the virtual image usage data, a user can use a plurality of virtual images; and if the user selects a target virtual image therein, the target virtual image is loaded in a target round, and permission data of the target virtual image associated with the virtual image usage data is updated. By applying the solution, when wanting to use different virtual images, the user does not need to spend a lot of time collecting different virtual images, thereby effectively reducing the user operation complexity, simplifying the operation steps, and improving the human-computer interaction efficiency.

本国际公布:

— 包括国际检索报告(条约第21条(3))。

(57) 摘要：提供一种虚拟形象使用数据的处理方法、装置、设备及存储介质，属于计算机技术领域。虚拟形象使用数据的处理方法通过查询已获取到的虚拟形象使用数据，确定虚拟形象使用数据所关联的至少两个第一虚拟形象以及第一虚拟形象的权限数据，也即是，用户获取到虚拟形象使用数据，即可对多个虚拟形象进行使用，若用户选择其中的目标虚拟形象，则在目标回合中加载该目标虚拟形象，更新虚拟形象使用数据所关联的目标虚拟形象的权限数据。应用上述方案，用户想使用不同的虚拟形象时，无需花费大量时间来收集不同的虚拟形象，有效降低了用户操作复杂度，简化了操作步骤，提高了人机交互效率。
