

Title of the Invention: SEALING MATERIAL AND METHOD FOR
PRODUCING SEALING MATERIAL

ABSTRACT

5 One embodiment of the present invention relates to a
sealing material or a method for producing a sealing
material, in which the sealing material is a radiation-
crosslinked body of an elastomer composition including a
crosslinkable fluoroelastomer (A) other than a
10 perfluoroelastomer, a crosslinking agent, and a crosslinking
aid, and the fluoroelastomer (A) contains a crosslinkable
fluoroelastomer (A1) that is other than a perfluoroelastomer
and has a fluorine content in a range of 66 to 68% by mass.
