

SHOOTING METHOD AND APPARATUS OF ELECTRONIC DEVICE, AND ELECTRONIC DEVICE

ABSTRACT

Embodiments of the present invention provide a shooting method and apparatus
5 of an electronic device, and the electronic device. The shooting method of an
electronic device provided in the embodiments of the present invention includes:
enabling a front-facing camera to prepare for shooting; and when the front-facing
camera is used to perform shooting, adjusting a pixel grayscale of a liquid crystal
display to a set grayscale value and/or adjusting a color of the liquid crystal display to
10 a set color, so as to supplement light to an object being photographed. In the
embodiments of the present invention, a pixel grayscale and/or a color of a liquid
crystal display are/is adjusted so as to supplement light to an object being
photographed, thereby resolving a problem of a dim shooting effect of a front-facing
camera.
