CLAIMS

[Claim 1] A meeting assistance system comprising:

a presentation document storage unit (3) that stores a presentation document;

an authority imparting unit (5) that grants a document operation right to a participant;

a document sharing unit (7) for sharing the presentation document with a participant; and

a presentation document updating unit (9) that operates and updates the presentation document stored in the presentation document storage unit (3) based on an operation from a plurality of right-holding participants to which a document operation right has been granted by the authority imparting unit (5), wherein

in a case where the document sharing unit (7) is sharing a ~~first~~ certain presentation document stored in the presentation document storage unit (3) with a plurality of participants, when the plurality of right-holding participants operate the ~~first~~ certain presentation document, the updated ~~first~~ certain presentation document is shared in real time with the plurality of participants,

for a certain image content as a content included in the certain presentation document, in a case where the meeting assistance system receives a command from two or more participants that have been granted the document operation right by the authority imparting unit (5) to move the certain image content, the presentation document updating unit (9) changes color of the certain image content and allows the image content to move according to commands from the two or more participants, and updates the certain presentation document, and~~.~~

~~[Claim 2] The meeting assistance system according to claim 1, wherein~~

the presentation document storage unit (3) exists on a web server.

~~[Claim 3] The meeting assistance system according to claim 1, wherein~~

~~the presentation document storage unit (3) exists on a speaker's computer, and~~

~~the presentation document updating unit (9) operates and updates the presentation document stored in the presentation document storage unit (3) based on, not only the operation from the plurality of right-holding participants, but also an operation from the speaker.~~

~~[Claim 4] A program for causing a computer to function as a meeting assistance system, the meeting assistance system comprising:~~

~~a presentation document storage unit (3) that stores a presentation document;~~

~~an authority imparting unit (5) that grants a document operation right to a participant;~~

~~a document sharing unit (7) for sharing the presentation document with a participant; and~~

~~a presentation document updating unit (9) that operates and updates the presentation document stored in the presentation document storage unit (3) based on an operation from a plurality of right-holding participants to which a document operation right has been granted by the authority imparting unit (5), wherein~~

~~in a case where the document sharing unit (7) is sharing a first presentation document with a plurality of participants, when the plurality of right-holding participants operate the first presentation document, the updated first presentation document is shared in real time with the plurality of participants.~~
