

ABSTRACT

[Abstract] The object of the present invention is to provide a multilayer film that can have good workability in a press setup along with being able to increase the yield rate for FPCs. Multilayer films 100, 100A relating to the present invention are provided with first mold release layers 110, 110a, and cushion layer 120. The first mold release layer is formed from a resin in which the main component is a polystyrene series resin having a syndiotactic structure as the main component. The cushion layer includes more than 60 parts by weight and 98 parts by weight or less of a polyolefin series resin, and 2 parts by weight or more and less than 40 parts by weight of a polystyrene series resin having a syndiotactic structure. Thus, this cushion layer is provided on one side of the first mold release layer.
