

METHOD, APPARATUS, DEVICE FOR PLAYING NAVIGATION AUDIOS, AND COMPUTER STORAGE MEDIUM

ABSTRACT

A method, an apparatus, and a device for playing navigation audios, and a computer storage medium are provided in the present disclosure, which relate to the big data technology. The specific implementation is: determining navigation audios to be broadcast in a navigation route and broadcast locations; and broadcasting a corresponding navigation audio at the broadcast location, and selecting non-navigation audios to be played in unoccupied durations between broadcast locations according to unoccupied durations. The technical solution of the present disclosure can select appropriate non-navigation audios to cut in and to be played in unoccupied durations between navigation audios on the premise of ensuring the playing of navigation audios, and moreover ensure the listening experience of non-navigation audios.
