

ABSTRACT**HEAD MASSAGER AND A DISTANCE ADJUST DEVICE
THEREOF**

A head massager includes a helmet (10) having a first parallel
5 hoop (11) and a second parallel hoop (12) connected to each other for
forming a ring surrounding the user's head. The helmet (10) has a first
meridian hoop (21) and a second meridian hoop (22) connected to each
other to form an arc structure and hang the head massager on user's
head. Three distance adjust devices (3) are provided to connect the first
10 parallel hoop (11), the second parallel hoop (12), the first meridian
hoop (21) and the second meridian hoop (22), and adjust the size of the
helmet(10) to provide comfort to user's head.
