WO 03/000118 A2

(54) Title: METHOD FOR ENHANCING THE EFFECTIVENESS OF CANCER THERAPIES

(57) Abstract: The efficacy of conventional cancer therapies such as surgery, chemotherapy and radiation is enhanced by the use of a therapeutic material which binds to and interacts with galectins. The therapeutic material can enhance apoptosis thereby increasing the effectiveness of oncolytic agents. It can also inhibit angiogenesis thereby moderating tumor growth and/or metastasis.
