(54) Title: TECHNIQUES FOR MESSAGE RETRANSMISSION MECHANISM

Figure 2

Example Embodiment: Message Retransmission via Multiple Repeater Nodes

(57) Abstract: Embodiments of the Message Retransmission Mechanism Apparatuses, Methods and Systems ("MRM") transform application requests for message journals via MRM components into expedited access to segmented message streams. In one implementation, the MRM may obtain message journal of messages written by applications during system operations and divide up the message obtained from the complete message journal into message segments. In some implementations, the MRM may provide recovering applications access to said message segments for expedited message consumption.
