(54) Title: BODY FITTING COMPOUND SANITARY NAPKIN

## (57) Abstract

A compound sanitary napkin comprising a primary absorbent member and a secondary absorbent member is provided. The primary absorbent member has a longitudinal length, a transverse width and a thickness, and comprises a primary absorbent element and a fluid pervious cover superimposed on the primary absorbent element. The secondary absorbent member has a longitudinal length, a transverse width and a thickness, and comprises a fluid pervious body-facing sheet, a fluid impervious garment-facing sheet joined to the fluid pervious body-facing sheet and a secondary absorbent element positioned between the fluid pervious body-facing sheet and the fluid impervious garment-facing sheet. The primary absorbent member is affixed to the fluid pervious body-facing sheet side of the secondary absorbent member by union means. A ratio of the thickness of the primary absorbent member to the transverse width of the primary absorbent member is between 0.05 and 1.5. The primary absorbent member has a capacity for absorbing loaded menstrual fluid when the sanitary napkin is applied to a female body and used.
