

[ABSTRACT]

STORAGE BATTERY CONTROL SYSTEM AND STORAGE BATTERY
CONTROL METHOD

5

A storage battery control system (100) includes: a storage battery pack (110) including a storage battery (111) and one or more sensors (113) for detecting an anomaly, and an information processor (120) that notifies a user related to the storage battery pack (110) of a check request regarding the anomaly when the anomaly is detected by the one or more sensors (113), obtains a check result for the check request from the user, and notifies the user of a recommended operation according to the check result.
