

ABSTRACT**METHOD FOR REFRIGERATING VEGETABLES AND FRUIT AND
A SYSTEM USED TO CARRY OUT THE METHOD**

A method for refrigerating vegetables and fruit has placing vegetables and fruit in a refrigerated container, repeatedly flooding and draining the refrigerated container to wash the vegetables and fruit and to lower the level of microorganisms, chilling the refrigerated container and spraying atomized chilled water into the refrigerated container. The appearances of the agricultural products are kept fresh for a long time without dehydrating the products.
