(54) Title: INTERMEDIATE TRANSFER BELT AND METHOD OF MANUFACTURING THE SAME

(57) Abstract: Disclosed is an intermediate transfer belt for use in a laser printer, a fax machine, or a copier, which is manufactured from a polyimide compound and has a decreased difference in surface resistivity between the inner surface and the outer surface thereof, even without the application of additional surface treatment, such as anti-static coating, thus realizing improved operating properties, and furthermore, is seamless and has uniform thickness thanks to the minimization of thickness variation. A method of manufacturing the intermediate transfer belt is also provided.
