SETTING METHOD, DEVICE AUTHENTICATION METHOD, DEVICE AUTHENTICATION SYSTEM, AND CONTROLLER

ABSTRACT

A method of setting which includes: obtaining (S104), from a smart meter (130), an ID of the smart meter; obtaining (S102), from a HEMS-controller (110), an ID and a certificate of the HEMS-controller and an ID and a certificate of an appliance (141, 142) controlled by the HEMS-controller; generating (S106) management information in which the ID of the smart meter, the ID and the certificate of the HEMS-controller, and the ID and the certificate of the appliance are associated with one another; and transmitting (S107), based on the management information, the ID and the certificate of the HEMS-controller and the ID and the certificate of the appliance which are associated with the ID of the smart meter, to the smart meter.
