(54) Title: WIRELESS NETWORK PAGING

Figure 5

(57) Abstract: In wireless communication, there may be improved paging communications with user equipment (UE). A network basestation and the UE may rely on paging identity information to calculate Paging Hyperframes (PH) and/or Paging Time Window (PTW). The paging information may include 5G System Temporary Mobile Subscriber Identity (5G-S-TMSI) or HASH identification (ID) information for paging in an inactive state of the UE. The communication of the paging identity information may be during a UE context setup procedure.
