Give Wisely
Using Newdea to manage your giving frees up more money that goes directly to work for the causes you care about.
Give Effortlessly
Using Newdea is efficient for donors - instantly fund multiple projects in a single portfolio anytime, anywhere, with one click.
Give Discreetly
Donors control the relationship created with each project by choosing to remain anonymous or be openly visible to each charity
3 Follow
Stay Informed
Each donor can create custom "Watch" lists for tracking real-time results and use of funds before and after gifts are made.
Build Custom Portfolios
Newdea offers a single source for building and monitoring donor portfolios of multiple projects from numerous non-profit organizations.
Form Giving Communities
Giving together works! Join and network others that share your passion to follow and shape the causes you care about.

Transaction Disbursement Batching Manager

Through this screen, you may batch a new disbursement or manage an actively batching disbursement.
- If you are creating a new disbursement, you may only add transactions to it. The first transaction you add, batches a new disbursement and filters the transaction list to only show transactions of the same Organization as the transactions in the disbursement.
- You may then add and remove transactions to this disbursement using the "Add" or "Remove" links for each transaction.
- **Remember, if you remove all transactions in a disbursement, the batch still exists, and the list will still be filtered.**
- Transactions are never removed from the system, so if you batch a new disbursement, even if it is empty, you must use the Manager to decline the disbursement.

Transaction Disbursement Manager

Through this screen, you manage the currently active Disbursements in the system (These are disbursements that have been batched, but not finalized).

Disbursement: a group of incoming transactions that have been grouped together to pay out to an Organization.

You may do three things on this page:
- **Batch a New Disbursement**: Click on the "Batch New Disbursement" button.
- **Manage a Batched Disbursement**: Click on the name of a disbursement that has been batched, but not committed to any other stage.
- **Manage an Active Disbursement**: Use the buttons in the "manage" column to manage an active disbursement.

When the disbursement reaches one of the two final stages (Approved or Declined) it will be removed from this list.

There are different Statuses a disbursement can be in. They are (in order):

- **Batching**: This status is for a disbursement that is still pending. That is, payment has not been sent.
- **Waiting On Document**: Payment is being sent to the Organization, but has not yet been received by them.
- **Clearing**: Payment has been received, but has not been debited from Newdea.
- **Approved Finalized**: Transaction is completed successfully. This status will never show on this page.
- **Declined Finalized**: Transaction is completed unsuccessfully. A Disbursement may be put in this status at any time, and will never show on this page.

Project Details for Indigenous Craft Center

What problem is this solving?

The purpose of this project is to provide a market for local crafts people in this community. And to access the tourist market to sell their products. In addition this project will provide training in business management and entrepreneurship.

Why Does the Problem Exist?

The issue in this project is that these ladies have very good skills to produce a marketable product. Their location and selling from individual homes does not facilitate selling to the tourists that come through this community. As a result the individuals sell only in their local community and do not take advantage of a potential market. Their sales in the local community are weak because the community as a whole is only slightly above the poverty level.

What is the Solution?

This project will involve a group of 24 indigenous weavers in the community of Salaasaca. At the present time these ladies sell from their homes which are scattered over the town and mostly hidden from view. The vision of this project is to construct a display and sales center of 240 square meters. If possible before June 2003 when the peak tourist season begins. This will facilitate the ladies selling their projects to tourists and providing a value added dimension to their products by selling them outside the community.

Transaction Disbursement Batching Manager

Through this screen, you may batch a new disbursement or manage an actively batching disbursement.
- If you are creating a new disbursement, you may only add transactions to it. The first transaction you add, batches a new disbursement and filters the transaction list to only show transactions of the same Organization as the transactions in the disbursement.
- You may then add and remove transactions to this disbursement using the "Add" or "Remove" links for each transaction.
- **Remember, if you remove all transactions in a disbursement, the batch still exists, and the list will still be filtered.**
- Transactions are never removed from the system, so if you batch a new disbursement, even if it is empty, you must use the Manager to decline the disbursement.

Transaction Disbursement Manager

Through this screen, you manage the currently active Disbursements in the system (These are disbursements that have been batched, but not finalized).

Disbursement: a group of incoming transactions that have been grouped together to pay out to an Organization.

You may do three things on this page:
- **Batch a New Disbursement:** Click on the "Batch New Disbursement" button.
- **Manage a Batched Disbursement:** Click on the name of a disbursement that has been batched, but not committed to any other stage.
- **Manage an Active Disbursement:** Use the buttons in the "manage" column to manage an active disbursement.

When the disbursement reaches one of the two final stages (Approved or Declined) it will be removed from this list.

There are different Statuses a disbursement can be in. They are (in order):

- **Batching:** This status is for a disbursement that is still pending. That is, payment has not been sent.
- **Waiting On Document:** Payment is being sent to the Organization, but has not yet been received by them.
- **Clearing:** Payment has been received, but has not been debited from Newdea.
- **Approved Finalized:** Transaction is completed successfully. This status will never show on this page.
- **Declined Finalized:** Transaction is completed unsuccessfully. A Disbursement may be put in this status at any time, and will never show on this page
