

5 **LUBRICATING OIL COMPOSITION INCLUDING COMB POLYMETHACRYLATE
AND ETHYLENE-BASED OLEFIN COPOLYMER VISCOSITY MODIFIERS**

ABSTRACT

10 Provided is a lubricating oil composition, for example a composition having a SAE 0W-20
viscosity grade or lower, comprising: (a) a major amount of an oil of lubricating viscosity, (b)
a non-dispersant comb polymethacrylate (PMA), and (c) a non-dispersant ethylene-based
olefin copolymer. Also provided is a method for reducing wear in an internal combustion
engine by lubricating the engine with the lubricating oil composition.
