(54) Title: AN ADVANCED DATA AND ANALYTICS MANAGEMENT PLATFORM

ADAM | Integration to EVA

FIG. 1

(57) Abstract: A advanced data management platform, method, and system allowing for several users to remotely access a centralized database and use analytical tools, models, and algorithms to analyse and extract predictive information, trends and the like from data sets. Moreover, the data management platform, method, and system includes the option of allowing for data analysis and model training with anonymized data. This then further allows for the trained model to be applied on data sets located outside of the data platform and/or system to derive predictive information about that data set.
