

ABSTRACT

Provided is an isopropyl alcohol accommodating body that accommodates isopropyl alcohol in a container. The isopropyl alcohol accommodating body has, in the container, an oxygen content of 0.001 to 0.100 mol ppm with respect to the isopropyl alcohol, and the content of acetone as an impurity in the isopropyl alcohol is 10 to 200 ppb based on mass. Also provided are a manufacturing method for the isopropyl alcohol accommodating body and a quality control method for the isopropyl alcohol accommodating body.
