(54) Title: METHOD TO CHECK A COFFEE BEANS ROASTING SYSTEM

FIG. 1

(57) Abstract: The invention concerns a method to check a roasting system (10), said system comprising : a roasting apparatus (2), said apparatus producing smoke, and - a smoke treating unit (3) configured to treat the flow of smoke produced by the roasting apparatus, and comprising a filtering device (221) and a couple of temperature sensors (24, 26) configured to measure temperatures of the flow of smoke upstream and downstream the filtering device (221), wherein, during a roasting operation, the method comprises the steps of :
- comparing the performances of the temperatures during at least a period of time of the roasting operation, and - if the performances are similar along time, then displaying an alarm.
