(54) Title: A LOAD MANAGEMENT DEVICE FOR A FEED BODY OF A MOLDING MACHINE

(57) Abstract: Disclosed herein is a load management device configured for a feed body of any one of a molding machine, a hot runner assembly and any combination thereof. The load management device includes a load-transferring body configured to present a load-receiving surface and a load-imparting surface. The load-transferring body is configured to connect the load-receiving surface with the load-imparting surface, to transfer a substantial amount of load-received by the load-receiving surface over to the load-imparting surface, and to transfer an in-substantial amount of load-received by the load-receiving surface over to the feed body.
