

A VIBRATION REDUCING ASSEMBLY

ABSTRACT

- 5 An assembly for reducing vibration felt by passengers in a compartment (10) of a moving vehicle. The assembly comprises a seat assembly (16) adapted to be secured to a side wall (12) of the compartment (10) and a floorboard assembly (18) secured to the seat assembly (16) by means of a resilient connection (22, 26, 28). The floorboard assembly (18) is
- 10 connected to the seat assembly (16) in such a way that the floorboard assembly (18) is spaced from each surface of the compartment (10).
