(54) Title: A SECURING ASSEMBLY

Figure 1

(57) Abstract: A securing assembly (1) adapted to secure objects (2) to a structure (3). The assembly (1) includes attachment means (5) adapted to attach said assembly to an object in use. An elongate rod (6) having a first end (6a) and a second end (6b). The first end connectable to the attachment means. The second end connectable to an adjustment means (5). A base (12) is adapted to connect said adjustment means to said structure in use. Whereby said adjustment means is operable to adjust a tension between said object and said structure by way of said assembly to secure said object to said structure in use.
