(54) Title: A METHOD OF MANAGING A HYDROELECTRIC TURBINE ARRAY

Figure 3

(57) Abstract: The present invention provides a method of managing a hydroelectric turbine array comprising installing a plurality of subsea foundations on a subsea surface and positioning interconnecting electrical cables between two or more of the subsea foundations, which cables then remain in position on the seabed during the operation of the array while allowing other components such as turbines to be removed for repair or the like without disturbing said cables.
