

ABSTRACT

"CONNECTOR APPARATUS FOR IC PACKAGES"

A connector apparatus for receiving and ejecting a plate-like I.C. package such as a memory card, which is to be connected to a electronic device is composed of a pair of spaced-apart guide members (2) designed to receive the package therebetween and connected to a detachably-mounted connector section (4) provided with pins (3a) for connecting with the package. A pivotable lever (6) serves to displace a pull-out plate (12) which engages with the package when the package is to be ejected.
