(54) Title: VIEWING APPARATUS

(57) Abstract: Apparatus for viewing an information mark on the table (7) of a gemstone (6) in the form of a jewellery case (1). The jewellery case 1 has a body portion (2) for holding a finger ring (5) with a gemstone (6) uppermost, and a pivoted lid 3. The pivoted lid (3) has an opening (15) in its top containing a x10 lens (16) so that when the cover (3) is pivoted open through say 30°, the gemstone table (7) can be viewed by eye through the lens (16) with the gemstone illuminated by light entering the case through the gap formed by opening the cover (3), which light strikes the gemstone table (7) obliquely and specularly reflects through the lens (16).
